

Ocean Engineering Seminar Series, Fall 2009

All Seminars are on Tuesday afternoons at 3:30 p.m. in Room 350 P.S. DuPont Hall,
unless otherwise noted.

OPEN TO THE PUBLIC

Date	Title & Speaker
September 1	<i>A New Conductivity Sediment Concentration Profiler (CCP) for the Measurement of Nearbed Sediment Concentrations: Application in a Solitary Wave-Driven Swash</i> Joseph Faries Graduate Student Center for Applied Coastal Research
September 22	<i>Wave Overtopping of Levees and Overwash of Dunes</i> Prof. Nobuhisa Kobayashi Director, Center for Applied Coastal Research
October 13	<i>Effects of Flocculation on Modeling Cohesive Sediment Transport</i> Minwoo Son PhD Candidate, Civil and Coastal Engineering University of Florida Visiting Student, Ctr. for Applied Coastal Res., UD
Thursday October 15 12:30 – 1:30	<i>Overview of Fundamental Methodologies Applied in Coastal Studies as Part of the FEMA National Flood Insurance Program (NFIP)</i> Elena Drei-Horgan Lead Coastal Engineer/Project Manager Management & Consulting Services Dewberry Fairfax, Virginia
November 17	<i>Wave Overtopping and Overwash of Dunes</i> Jens Figlus Doctoral Student Center for Applied Coastal Research
November 24	<i>Wave Action and Damage on Stone Structures</i> Ali Farhadzadeh Doctoral Student Center for Applied Coastal Research
December 1	<i>Shear Instability and Mixing in Highly Stratified Estuaries</i> Rocky Geyer, Ph.D. Senior Scientist Woods Hole Oceanographic Institution Applied Ocean Physics and Engineering
